5 - DAY TROPICAL CYCLONE OUTLOOK

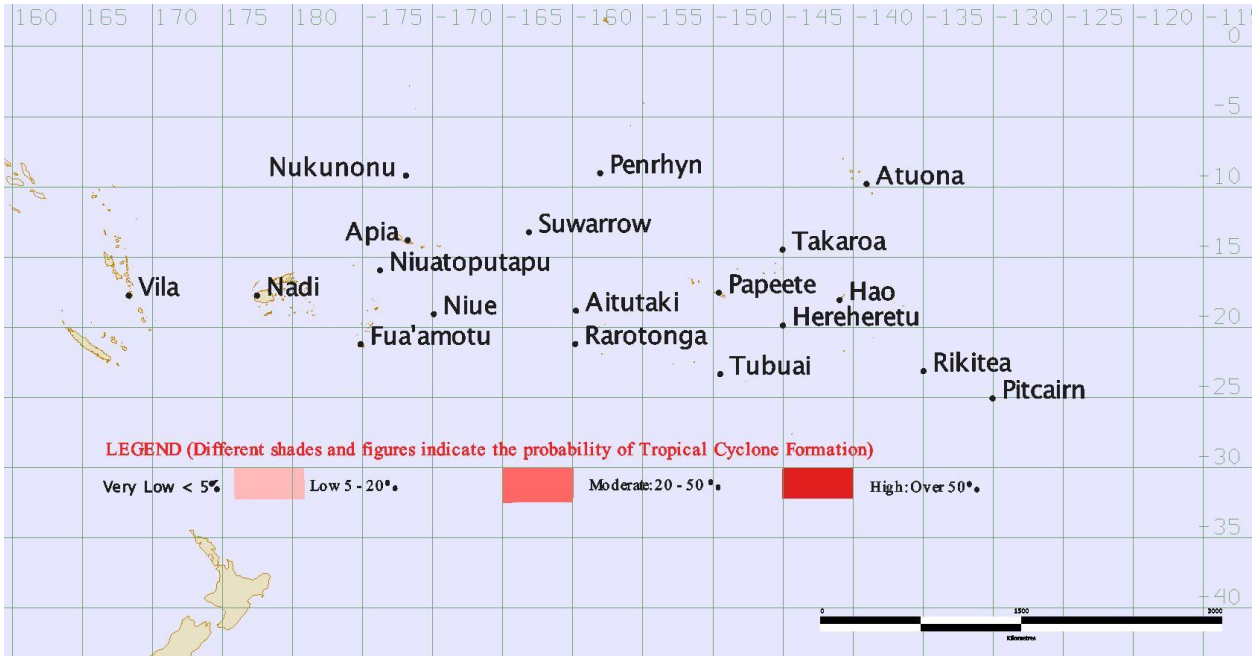

Equator to 25S and 160E to 120W
Issue Time: 0400 UTC Thursday 12th November 2026.
Next Issue: 0400 UTC Friday 13th November 2026.
Issued by: Tropical Cyclone Centre, RSMC, and Nadi.

Existing Tropical Cyclones:
Nil.

Likelihood of a tropical cyclone formation in the region in the next five days, till Tuesday 17th November, 2026:

A tropical low pressure system center (1009 hPa) center was analyzed near 06.0S 161.0W or to the north of Northern Cooks at 120000UTC. The potential for this system to develop into a Tropical Cyclone are as follows:

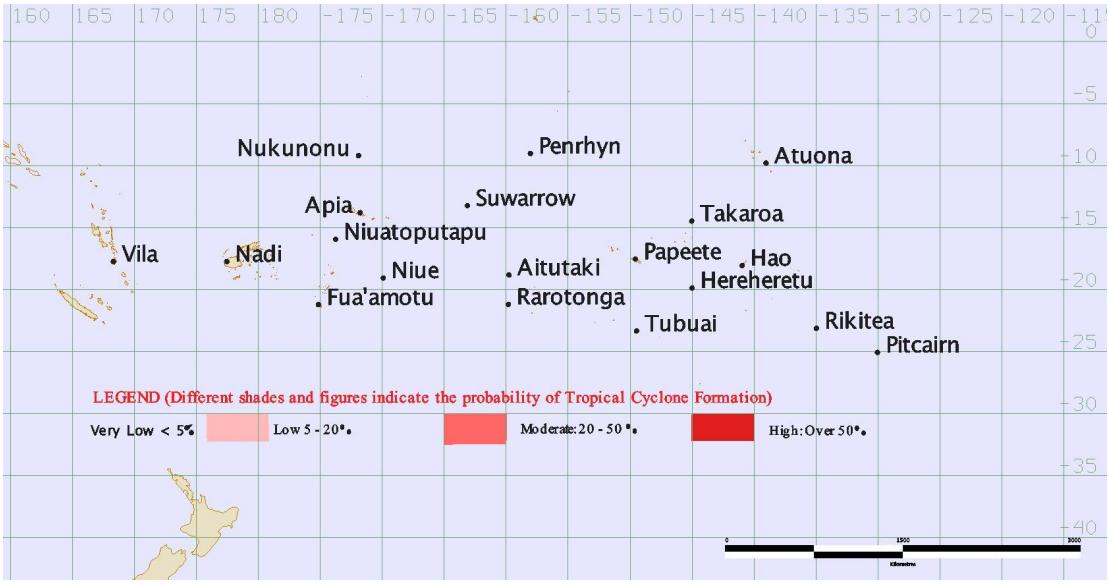

Friday 13th November
The potential for formation of a Tropical Cyclone from the low pressure system to the north of Northern Cooks is **VERY LOW.**
The potential for formation of a Tropical Cyclone in the region from any other system is **VERY LOW.**

Saturday 14th November

The potential for formation of a Tropical Cyclone from the low pressure system to the north of Northern Cooks is **VERY LOW.**

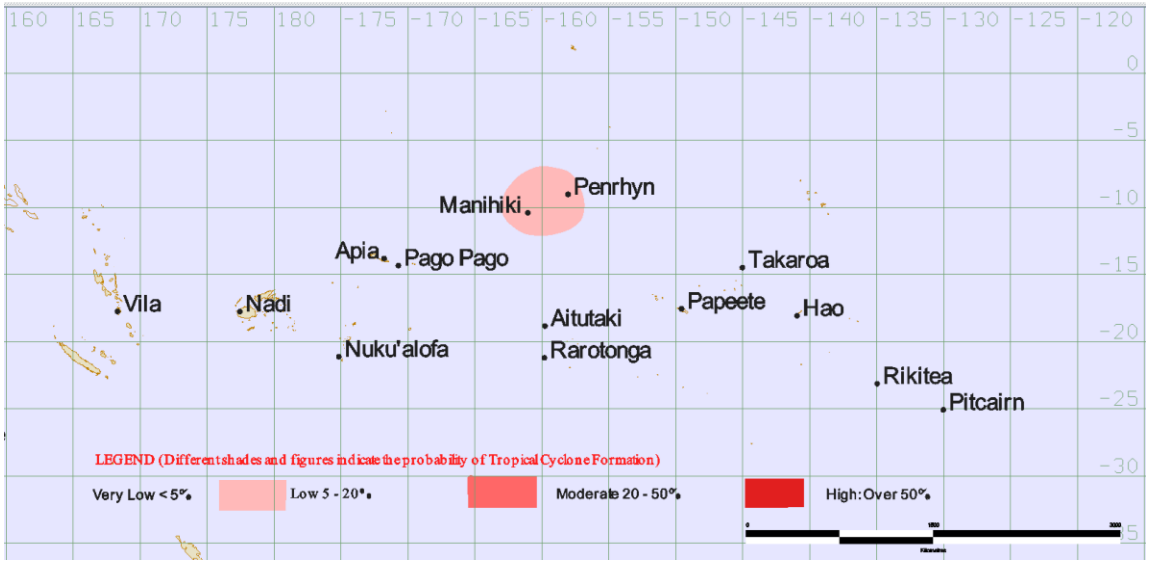

The potential for formation of a Tropical Cyclone in the region from any other system is **VERY LOW.**

Sunday 15th November

The potential for formation of a Tropical Cyclone from the low pressure system to the north of Northern Cooks is **LOW** and is likely to lie in the shaded region below**.**

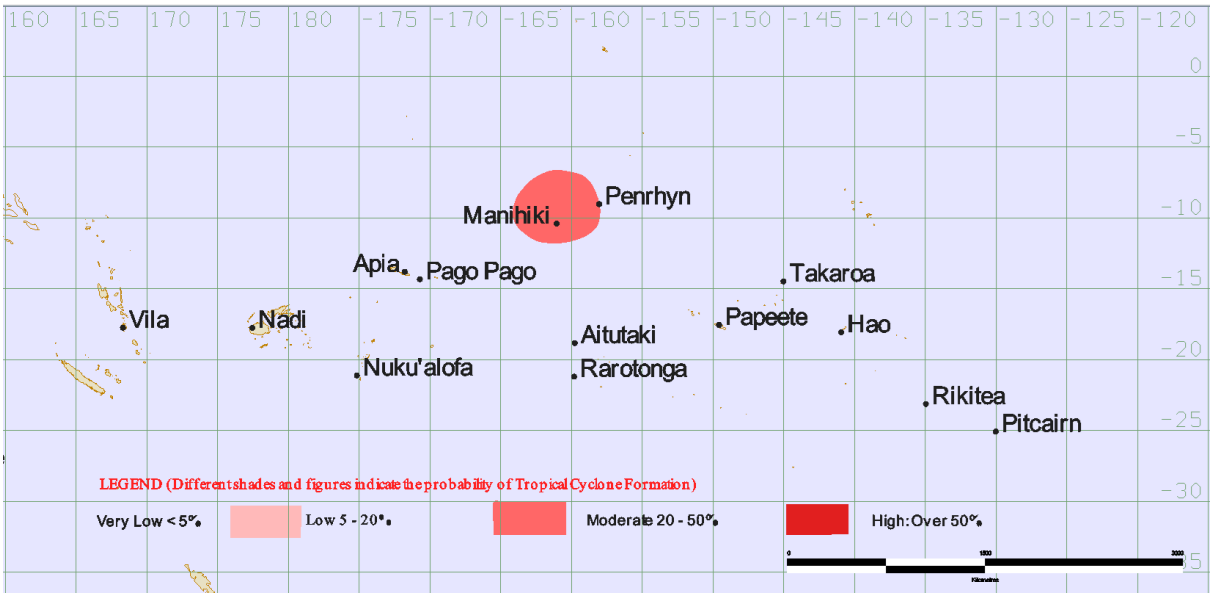

The potential for formation of a Tropical Cyclone in the region from any other system is **VERY LOW.**

Monday 16th November

The potential for formation of a Tropical Cyclone from the low pressure system to the north of Northern Cooks is **MODERATE** and is likely to lie in the shaded region below**.**

The potential for formation of a Tropical Cyclone in the region from any other system is **VERY LOW.**

Tuesday 17th November

The potential for formation of a Tropical Cyclone from the low pressure system to the north of Northern Cooks is **MODERATE to HIGH** and is likely to lie in the shaded region below**.**

The potential for formation of a Tropical Cyclone in the region from any other system is **VERY LOW.**
